x-mind prime 2

Easy Acquisition Effective Workflow

- X-MIND® prime has been engineered to make your daily operations faster and more efficient.
- Its effortless and lightweight wall mounting solution, allows to quickly install it almost everywhere, ensuring the maximum accessibility in any context, for both standing or sitting patients.
- Its clean and neat user interface with finely designed workflows is intended to fulfill your daily tasks with the minimum number of steps, to take you straight to the result.
- Easy. Effective. Simply X-MIND® prime.

Ergonomic and user-friendly design

Reduce operator interventions and increase patient comfort

Stylish and smooth design underlying a cutting-edge technology.

Easy and fast **face-to-face patient positioning**.

Fast installation
X-MIND® prime is ready to install! Delivered completely assembled at your practice, you are all set-up in only one hour.

Ergonomic head positioner with centering references **optimized to improve the accuracy in positioning** and reduce the incidence of movements during scanning in cephalometric mode.

Full accessibility for standing or sitting patient thanks to its zero footprint.

Automatic FOV centering, LED light chin rest recognition.

FAQ...

What's the maximum FOV size available on X-MIND Prime Version 2?

The maximum FOV size available on X-MIND Prime 2 is 12x10 cm (hxθ).

What's the highest resolution available on 3D images for X-MIND prime Version 2?

The highest resolution available on 3D images for X-MIND prime 2 is 72.5 µm.

Is it the highest resolution applicable to all the available FOVs?

The highest resolution of 72.5 µm is applicable only on 5x5 FOVs, for all the other 3D acquisition modalities the reference voxel size is 145 µm.

Is the 72.5 µm of voxel size a technical specification hardware or software based?

The voxel size is a technical specification hardware based.

What's new on X-MIND Prime Version 2?

On X-MIND prime 2 we have introduced:

- a new overall pleasant design with improved usability and reliability of the mobile sensor
- a new redesigned user interface improved in usability
- a new 3D panel with an improved resolution of 72.5 µm
- a new filter for metal artifacts compensation improved in performances (SMART) a new 12x10 cm FOV improved in quality.
- a new imaging software AIS 5 improved in usability and capabilities
- a new software CM-Suite developed to significantly simplify the post installation

processes and the device maintenance
